

ELEVATE YOUR CASH PROCESS

With our multivendor enterprise management solution

CETIS.EMC – Enterprise Management for Cash Systems

The CETIS.EMC software solution enables retailers to centrally manage large networks of cash handling devices from different manufacturers and maps all cash processes transparently in a unified model.

The solution helps simplify processes ranging from cash management to device management and data management. Additionally, the comprehensive reporting functionality identifies potential for optimization.

The entire solution is designed to be strictly hardware-independent, allowing cash devices from different vendors to be managed in a uniform infrastructure - even mixed within a single organisation. CETIS.EMC is therefore the central information point for a wealth of detailed information.

CASH MANAGEMENT

Your benefits

- ✓ Flexible use thanks to multivendor capability
- ✓ Transparency regarding device status and cash holdings
- ✓ Reduction of cash-in-transit costs
- ✓ Increased liquidity through optimized cash removals
- ✓ Reduced workload due to high level of automation
- ✓ High availability of cash devices

Who we are

S&N Invent stands for software and digitalization expertise. Traditionally, we have close ties with the financial sector, to which we have been supplying customized software solutions for over 30 years. We also maintain close relationships with industry, public administration and the retail sector, which value us for our process excellence and interface expertise.

Our focus is on IT consulting and agile software development. Our portfolio is rounded off by innovative software products that simplify existing processes and identify optimization potential.

S&N Invent is a company of the S&N Group AG. The group has more than 500 employees at ten locations in Germany, Austria and Hungary, who contribute to solving our customers' challenges in a targeted manner.
